WORK EXPERIENCE

Tekion — Staff Software Engineer

JAN 2023 - PRESENT

- Designed, planned and led the architecture of the Galaxy project (a platform to support 5 types of deal calculation to sell cars) including 20 microservices and managed the life cycle of each feature.
- Migrated from API based data sync to Event based eventually reducing the sync time.
- Reviewed pull requests from 12-15 Engineers across all Galaxy services.
- Pre-groomed features with the Product before the hand-off session.
- Led the initiative to keep UT coverage beyond 80% in each service.
- Held org wide tech sessions to promote learning and sharing culture.

Tekion — Senior Software Engineer

JAN 2022 - DEC 2022

- Led the Galaxy project to support calculation for Canada along with R3 data.
- Implemented multilayer caching with container in-memory, Redis and Mongo to get the latency down to sub 10ms from 500ms of most hit api in Galaxy.
- Part of the Interview Panel and took more than 50 interviews in a year.
- Maintained the culture of the team as the strength increased from 2 to 14 members.

Tekion — Software Engineer

DEC 2020 - DEC 2021

- 1st member of the Galaxy project and took it from 0 to 1.
- Owned services to process the Rate, Residual, Rebate information later to be used in deal calculation. Integrated with Kafka to sync this data from other team's services.
- Managed querying ~1M records of data with varying data pattern maintaining throughput of 20 tps.

Khoros — Software Engineer 3

MAR 2020 - DEC 2020

- Created POC on AWS for an event live streaming using AWS Elemental MediaLive, AWS Elemental MediaStore, AWS Elemental MediaConvert and Amazon CloudFront.
- Developed workflow for Events and Live Streaming on Community platform.

Khoros — Software Engineer 2

APR 2018 - MAR 2020

- Enhanced the User experience while posting any content on Community.
- Upgraded the TinyMCE Editor version including the new plugins available.
- Gather the requirements from Product Owner, Design and implement various solutions.

Oracle — Member of Technical Staff

JUL 2015 - APR 2018

- Worked on Human Workflow and Rules in Oracle SOA Suite 11g and 12c version.
- Worked on JDeveloper to create BPEL process featuring Human Workflow and Rules to debug the product and provide the solution as patch to customers.

Salesforce — Software Developer Intern

JUL 2014 - JUN 2015

- Developed a plugin for Jenkins to take input from users who could then timely run their builds and have automatic mails of the result.
- Created resources to automatically download packages reducing the downtime of a cluster to half.

EDUCATION

BITS Pilani, Goa

2010 - 2015

MSc. (Hons.) Mathematics & B.E. (Hons.)
Computer Science (8.42/10)

PROJECTS

Connect Kid

JUN 2016 - APR 2017

Platform to connect daycare and Parents

- Developed a React native Android mobile app.
- Developed Web application backend in Java using Spring Framework, Spring Security for JWT and Spring MVC Rest.

Google Chrome extension

JUN 2016

Media controller extension

- Published a chrome extension, Gaana media controller, for easy access to control the media played on <https://gaana.com>

ACHIEVEMENTS

Google Hackathon

1st Runner-up at Google Hackathon 2018 (Bangalore)

Vista APAC Hackathon

4th out of 22 teams at Vista APAC Hackathon – Lithium Technologies

INSPIRE Scholar

Scholarship provided by Department of Science & Technology, Govt. of India
